Re: System Performance Measures (SPM) 14-15 to 15-16 Comparison

---

Attached to this memo is a summary comparison for the first two years of the new HUD System Performance Measures (SPM) for each of Hawaii's two CoCs. Also attached are the HUD HDX submission reports for both CoCs. Note that "SPM 3.1: Change in PIT Counts" compares PIT 2015 with PIT 2016 and does not include the most recent 2017 counts. There are currently no SPM national standards or national averages. It is recommended that the full SPM report be read thoroughly for each CoC to better understand the definitions used for each SPM calculation.

With respect to BTG/PIC comparisons, PIC has more than three times the shelter capacity of BTG. Differences in the types of facilities (more emergency than transitional beds) will impact comparisons. Comparisons are presented because they allow for better identification of solutions and for more effective collaboration at the statewide level. Below are summary highlights for each SPM.

SPM 1: Length of Time Homeless – Overall POSITIVE: Grade A
PIC: Decreases in average and median stay from 14-15 to 15-16 for both ES/SH and ES/SH/TH.
BTG: Decreases in average and median stay from 14-15 to 15-16 for both ES/SH and ES/SH/TH
Comparison: BTG has shorter stays compared to PIC.

Action Items: None
Special Note: Not included in the comparison is HUD's reformulation for 15-16, which includes Universal Data Element 3.17 "Time spent on the street or shelter". SPM 16-17 will use the new definition including 3.17 and will replace the current 15-16 numbers with these revised numbers. This will produce a much higher length of time homeless, since it includes days prior to the actual shelter entry date.

SPM 2: Returns to Homelessness – Overall MOSTLY POSITIVE: Grade B
PIC: Reductions in returns to homelessness among 4 of 5 categories.
BTG: Reductions in returns to homelessness among 3 of 5 categories
Comparison: PIC has slightly higher (19%) returns within two years compared to BTG (18%)

Action Items: Significant increase in returns to homelessness among BTG PSH projects.

SPM 3.1: Change in PIT Counts – Overall NEGATIVE: Grade C
PIC: Large increase in unsheltered homelessness. Decrease in transitional bed counts.
BTG: Large increase in unsheltered homelessness. Increase in transitional bed counts.
Comparison: On a per capita basis, BTG has a much higher rate of homelessness considering that the PIC population is 2.5 times the population of BTG.

Action Items: Significant increases in unsheltered homelessness for both PIC and BTG.

CPC: Memo on System Performance Measures

SPM 3.2: Change in Annual Counts – Overall MOSTLY POSITIVE: Grade B
PIC: Reduction in total unduplicated sheltered persons. Increase in emergency shelter persons.
BTG: Small reductions in overall sheltered persons, both emergency and transitional persons.
Comparison: Similar rates of shelter usage. Shelter capacity nearly 3.5 times greater in PIC than BTG.

Action Items: None

NOTE: SPM 4 only analyzes CoC Funded Projects

SPM 4: Change in Cash Income (Stayers) – Overall NEGATIVE: Grade C
PIC: Small reductions in Non-Employment and Total Income. Employment income no change.
BTG: Decreases in employment, non-employment and total income.
Comparison: BTG experienced much larger drops in income compared to PIC.

Action Item: Systematic review of all income outcomes for BTG's CoC-funded projects.

SPM 4: Change in Cash Income (Leavers) – Overall NEGATIVE: Grade C
PIC: Small reductions in Non-Employment and Total Income. Slight increase in Employment income.
BTG: Large decreases in non-employment and total income.
Comparison: PIC's employment income rate was much higher than BTG's.

Action Item: Review non-employment and total income outcomes for both CoCs.

SPM 5.1: Persons Homeless First Time with 2 years (ES/SH/TH)– Overall POSITIVE: Grade A
PIC: Small decrease in entries with prior history.
BTG: Significant decrease in entries with prior history.
Comparison: Similar rates of entries without prior HMIS history (PIC = 71%; BTG = 75%).

Action Item: None

SPM 5.2: Persons Homeless First Time with 2 years (ES/SH/TH/PH)– Overall POSITIVE: Grade A
PIC: Decrease in entries with prior history and without prior history
BTG: Decreases in entries with prior history and without prior history
Comparison: Identical rates of entries without prior HMIS history (PIC = 71%; BTG = 71%).

Action Item: None

SPM 7: Exits to Permanent Housing - Mostly POSITIVE: Grade B
PIC: Large increase in exit rate to temporary, some institutional, and permanent housing from outreach programs.
BTG: Large increase in exit rate among outreach; modest decreases from other program types. (ES/TH/RRH/PH)
Comparison: Outreach rate identical in FY16. Other exit rates higher in PIC than BTG.

Action Item: Review BTG permanent housing placement rates and reduce unknown/missing exit destination rates.

FY2016 - Performance Measurement Module (Sys PM)

Summary Report for HI-501 - Honolulu CoC

Measure 1: Length of Time Persons Remain Homeless

This measures the number of clients active in the report date range across ES, SH (Metric 1.1) and then ES, SH and TH (Metric 1.2) along with their average and median length of time homeless. This includes time homeless during the report date range as well as prior to the report start date, going back no further than October, 1, 2012.

Metric 1.1: Change in the average and median length of time persons are homeless in ES and SH projects.
Metric 1.2: Change in the average and median length of time persons are homeless in ES, SH, and TH projects.

a. This measure is of the client's entry, exit, and bed night dates strictly as entered in the HMIS system.

	Universe (Persons)		Average LOT Homeless (bed nights)			Median LOT Homeless (bed nights)		
	Previous FY	Current FY	Previous FY	Current FY	Difference	Previous FY	Current FY	Difference

1.2 Persons in ES, SH, and TH	6651	6430	349	250	-99	250	173	-77

b. Due to changes in DS Element 3.17, metrics for measure (b) will not be reported in 2016.

This measure includes data from each client's "Length of Time on Street, in an Emergency Shelter, or Safe Haven" (Data Standards element 3.17) response and prepends this answer to the client's entry date effectively extending the client's entry date backward in time. This "adjusted entry date" is then used in the calculations just as if it were the client's actual entry date.

NOTE: Due to the data collection period for this year's submission, the calculations for this metric are based on the data element 3.17 that was active in HMIS from 10/1/2015 to 9/30/2016. This measure and the calculation in the SPM specifications will be updated to reflect data element 3.917 in time for next year's submission.

Measure 2: The Extent to which Persons who Exit Homelessness to Permanent Housing Destinations Return to Homelessness

This measures clients who exited SO, ES, TH, SH or PH to a permanent housing destination in the date range two years prior to the report date range. Of those clients, the measure reports on how many of them returned to homelessness as indicated in the HMIS for up to two years after their initial exit.
