

Report Brief
Compliance to Chronic Homeless Data Completion
 For the Month of June 2017

C. Peraro Consulting, HMIS Administrator, State of Hawaii

The CPC HMIS team completed an analysis reviewing data completion for the “Chronic Homeless” fields for new adult intakes (n=1,241) during June 2017. Key findings include:

All Cases Entered during June 2017:

- A total of 201 out of 1,241 (16%) reported MISSING DATA under the Chronic homeless field
- 190 of the 201 intakes (95%) with missing data were new OUTREACH intakes
- Both Hawaii and Kauai reported no missing data (0%) for the chronic homeless field
- Maui had 2 out of 201 cases (1%) with missing data for the chronic homeless field
- Oahu reported 199 out of 842 (24%) with missing data for the chronic homeless field
- **Three Outreach organizations on Oahu accounted for 184 of the 201 cases (92%) with missing data including the CHOW Project (35 missing cases), Kalihi Palama Health Center (113 missing cases) and Waianae Coast Comprehensive Health Center (36 missing cases).**
- A review of the missing cases does not reveal a specific staff member for these cases since the assessment name and user ID are also missing for these cases.

All Cases active during June 2017:

- A total of 21%, or 1,791 out of 8,409 adults, contained missing data necessary to calculate the chronic homeless field. This represents the same rate as reported in May 2017 and a 28% overall decline since the January 2017 report.
- Comparing missing data by program, Outreach had the highest level with 45%, followed by Permanent Supportive Housing 20%, Transitional Housing 8%, Emergency Shelter 4%, and Rapid Rehousing 4%.
- Homeless Prevention showed a missing rate of 9% (54 cases) with 5 cases reported as chronically homeless. By definition, adults served by homeless prevention programs are not chronically homeless.
- Due to the design of entering street outreach information into the HMIS, the chronic homeless fields are not entered for outreach cases until they become “engaged”, this in turn contributes to high missing CH rates. Interpretation of the missing rate among these cases must take this under consideration.

The following table summarizes the MISSING status of all active ADULT cases (n=8,409) in the system during the month of June 2017 by Program Type. Outreach records represent approximately 70% of all cases with missing data followed by PSH, which represents approximately 16%. Missing rates >10% are marked in RED.

Type of Program	No	Yes	Missing Data	Grand Total	% Missing
Emergency Shelter (ES)	1,092	261	60	1,413	4%
