

Report Brief
Compliance to Chronic Homeless Data Completion
 For the Month of January 2018

C. Peraro Consulting, HMIS Administrator, State of Hawaii

The CPC HMIS team completed an analysis reviewing data completion for the “Chronic Homeless” fields for new adult intakes (n=1,049) during January 2018. No reports were completed for October, November and December 2017 due to CaseWorthy delays in correcting the HMIS chronic homeless assessment fields. Key findings of the report include:

All Cases Entered during January 2018:

- A total of 153 out of 1,049 (15%) reported MISSING DATA (including data not collected or client refused) under the Chronic homeless field, a 3-percentage point increase compared to September 2017 with 164 records missing data out of 1,359 records.
- 111 of the 153 intakes (73%) with missing data were new OUTREACH intakes
- Missing data was reported for the chronic homeless field for Hawaii (10 cases), and Maui (20 cases); Kauai had no missing data for this field.
- Of Oahu’s 720 intakes, 123 (17%) lacked data for the chronic homeless field, the same rate as in September.
- *Two Outreach organizations on Oahu accounted for 84 of the 123 cases (68%) with missing data including the Kalihi Palama Health Center (49 missing cases) and Waianae Coast Comprehensive Health Center (35 missing cases).*

All Cases active during January 2018:

- A total of 12%, or 949 out of 7,962 adults, contained missing data necessary to calculate the chronic homeless field. This is a 76% decline compared to the 49% rate of missing data in the January 2017 report. Note that the Jan 2018 new intake rate of 15% for missing data represents a slight increase.
- Comparing missing data by program type, Outreach had the highest level with 29%, followed by Services Only and Prevention (9%), Permanent Supportive Housing and Transitional Housing (8%), Emergency Shelter (7%), and Rapid Rehousing (5%).
- Homeless Prevention showed a missing rate of 9% (69 cases) with 2 cases reported as chronically homeless. Adults served by homeless prevention programs should not be chronically homeless.
- Due to the design of entering street outreach information into the HMIS, the chronic homeless fields are not entered for outreach cases until they become “engaged”, this in turn contributes to high missing CH rates. Interpretation of the missing rate among these cases must take this into consideration.

The following table summarizes the MISSING status of all active ADULT cases (n=7,962) in the system during the month of January 2018 by Program Type. Outreach records (512) represent approximately 54% of all cases with missing data followed by Emergency Shelter (114), which represents approximately 12%. Missing rates > 10% are marked in RED.

Type of Program	No	Yes	Missing	Grand Total	% Missing
Emergency Shelter (ES)	1,223	311	114	1,648	7%
Homeless Outreach	706	546	512	1,764	29%
