Re: July 2016 HMIS Reports

Attached for your review and dissemination to the two Continuums are the following reports. These reports use data extracted as of the 15th of August after the end of July (or later):

1) July 2016 Census Report – This is a program-by-program census report extracted from the HMIS system reporting the number of enrollments in each program for both HI-500 and HI-501 on the last day of month - July 31, 2016. These totals are matched with the facilities listed on the Housing Inventory Chart submitted to HUD in January 2016.

Current totals contain inaccuracies due to several major reasons: 1) Continued transition from the legacy system, 2) Delays by providers in completing all intakes and exits, 3) Program specific issues that are causing inaccuracies, 4) Related training issues that are causing operator errors, and 5) Inaccuracies in the current HIC bed totals. A monthly review of all programs will help to reduce these inaccuracies in the future and prevent future problems before they became acute.

Active totals are listed for the Rapid ReHousing programs separately. There is no bed count associated with these programs so there is not capacity percentage or variance presented.

2) July 2016 Data Timeliness Report – This report is run for the six-month period from February 1, 2016 through July 31, 2016 using the CaseWorthy report function. The report has been organized by type of program for easier review and comparability. Current high values for many programs are also thought to be caused by the same reasons outlined above for the census report.

As monthly data are reported, CPC will put together charts to review monthly trends at the program and CoC level.

Report Definitions and Abbreviation Explanations

Header Definitions:

- HIC Beds: Total bed capacity as listed on the Housing Inventory Chart (HIC) submitted to HUD in the most recent NOFA funding application.
- Census on July 31th: Report calculation by CaseWorthy totaling the number of active enrollments in program in the system on July 31th (last day of report month).
- % HIC Beds: Represents the percent of beds filled as on the census day. The census number divided by the reported maximum bed number. Numbers greater than 100% represent overcapacity or counts that may contain errors (missing discharges).
- Technical Openings: Represents the number of beds open/unused based on comparison of the HIC bed count and the census bed count. May not necessarily represent the actual beds available due to variation in family members per unit, off-line units and other circumstances. Provide a general comparison that can highlight potential issues. If filled or overfilled, value is set to zero.

Abbreviations:

NL – Not Listing. Either on HIC or in CaseWorthy program listing

NA – Not Applicable

SP – Special Populations that are confidential and not currently reported on CaseWorthy reports.
Populations included Domestic Violence, AID/HIV and Youth.
