Introduction

A critical aspect of the McKinney-Vento Homeless Assistance Act is a focus on viewing the local homeless response as a coordinated system of homeless assistance options as opposed to homeless assistance programs and funding sources that operate independently in a community. This report includes results from HUD's 2020 LSA, which is produced by using HMIS data submitted to HUD for the period 10/1/2019 - 9/30/2020. The report also includes dashboards from HUD's Stella Performance Module, which uses dynamic visuals of BTG's LSA data to illustrate how households move through the homeless system and highlights outcome disparities. The LSA report provides HUD and BTG with critical information about how people experiencing homelessness utilize the homeless services system.

System Performance Overview

The System Performance Overview dashboard conveys information about the performance of the homeless system. This display includes the number of households and people served in the homeless system. The numbers include everyone served in ES, SH, TH, RRH or PSH projects during the report period, even households that were continuously enrolled in RRH and PSH projects and did not experience any days homeless during the period.

The Days Homeless measure reports average cumulative time households spent in ES, SH and TH projects, and in RRH and PSH projects prior to move-in. The Permanent Exits measure reports the percent of households that exited to a permanent destination. The Returns measure reports returns to the homeless system within six months of an exit to a permanent destination.

System Performance Overview

System Performance by Household Type

This series of charts shows performance for the three household types - Adults Only (AO), Adult & Child (AC) and Child Only (CO). The universe for the first chart is households served in ES, SH and TH projects, and in RRH or PSH projects before move-in. In the ring chart, the total number of households is shown inside the ring. In the bar chart, the average number of cumulative days households were served is graphed and listed at the end of the bar for each household type.

In the next chart series, the universe is the number of households that exited the homeless system from ES, TH, RRH or PSH during the report period. The total number of households that exited is shown in the

middle of the ring for each household type. The percent of households who exited to permanent destinations is represented in the green sub-section of the ring, and is displayed below each ring.

The last chart series shows returns to the homeless system within six months of an exit to a permanent destination. The universe for this chart is households who exited in the first six months of the report period. The number of households that exited to permanent destinations is shown in the center of each ring. The percent of those households who returned to the homeless system is represented in the outer ring segment, and displayed below each ring.

Households with Days Homeless and Days Homeless by Household Type Households that had at least one day in ES, SH, TH, or RRH; or at least one day in PSH prior to move-in and the average cumulative, unduplicated number of days that households were served in ES, SH, or TH projects; and days in RRH or PSH prior to move-in. Adult Only 126 DAYS 1,396 Adult & Child 160 DAYS Child Only 415 DAYS Exits by Household Type Percent of households that exited to permanent destinations ADULT ONLY ADULT & CHILD CHILD ONLY 680 247 0 HH Exited HH Exited HH Exited 0% 41% 75% Exited to permanent destinations Exited to permanent destinations Exited to permanent destinations Permanent Destinations Temporary + Unknown Destinations Returns by Household Type Percent of households that returned to the homeless system within six months of exiting to permanent destinations. The universe for the chart is households that exited within the first six months of the report period.

System Performance by Household Type (served, exits, returns)

Trends

Exits to Permanent Destinations Trend

This chart shows the number of households that exited from the homeless system in the current report period compared with the number that exited in the two previous report periods. The percent that exited to permanent destinations is shown in the sub-section of each ring. The line chart beneath the rings shows the percent of exits to permanent destinations for all households and for each household type for each of the three report periods.

Exits to Permanent Destinations Trend (2018-2020)

Line Graph Data Points by Year

	2018		2019		2020	
	PH Rate	# of HHs	PH Rate	# of HHs	PH Rate	# of HHs
All Households	44%	510	46%	483	50%	462

Child Only	0%	0	0%	0	0%	0

Returns to the Homeless System Trend

This chart shows the percent of households that returned to the homeless system within six months of exiting to a permanent destination compared to the percent that returned within six months in the two previous report periods. The line chart beneath the rings shows the percent of returns to the homeless system within the first six months of exiting to a permanent destination for all households and for each household type for each of the three report periods. For the current report period, the universe for the chart is households that exited within the first six months of the report period.

Returns to Homeless System Trend (2018-2020)

Line Graph Data Points by Year

	2018		2019		2020

Child Only	0%	0	0%	0	0%	0

System Performance Map

Households use different combinations of project types during the time they are served in the homeless system. These project type combinations are referred to as pathways. Each pathway has different average cumulative days homeless, exits to permanent housing and returns to the homeless system. The system map shows performance for the main project types in the homeless system.

The system maps below show all pathways and indicate the percent of households that used that pathway, the average days that households were served in each project type in the pathway, the percent of households in the pathway group that exited to permanent destinations, and the percent of the pathway group that returned to the homeless system within six months of exiting to a permanent destination. The universe for returns is households who exited in the first six months of the report period. Households can engage with each project type in a pathway in any order. The system maps have been filtered by household type.

System Performance Map: Adult Only Households – All Pathways

System Performance Map: Adult and Child Households – All Pathways

System Performance Map: Adult Only Veteran Households – All Pathways

Days Homeless

Average Days Homeless

This chart shows the average cumulative days households were served in ES, SH and TH projects, and in RRH or PSH projects before move-in for households in the number at left and for each household type in the bars on the right. Days Homeless also includes contiguous or uninterrupted time in these projects prior to the report period.

Average Days Homeless: All household types

Time Distribution of Days Homeless

This chart shows the time distribution of average cumulative time households were served in ES, SH and TH projects, and in RRH or PSH projects before move-in, over increments of one or more months for each household type. Days Homeless also includes contiguous or uninterrupted time in these projects prior to the report period.

Time Distribution of Days Homeless: All household types

Days Homeless by Pathway

The chart shows the percent of households using different pathways or combinations of project types and the average days homeless for each pathway.

The length of the bars to the left of the Point of Housing line indicates the average cumulative days households were homeless in ES, SH or TH projects, or in RRH or PSH projects prior to move-in for each pathway. Days that a household was simultaneously enrolled in more than one project type will only be counted towards one project type. For example, if a household was enrolled in an ES while enrolled in

RRH prior to housing placement, the days homeless would be counted into the emergency shelter and not in the RRH project. Days Homeless also includes contiguous time in these projects prior to the report period.

The length of the bars to the right of the Point of Housing line indicates the average cumulative days households were enrolled in rapid re-housing after move-in for each pathway. The average days in RRH after move-in and the number of households included in the measure is shown in the hover text. This part of the measure only includes households that have a RRH housing move-in date.

The percent on the far right of the pathways that include PSH indicates the percentage of households that moved into permanent supportive housing for each pathway.

Days Homeless by Pathway: Adult Only Households

Days Homeless by Pathway: Adult and Child Households

Days Homeless by Pathway: Adult Only Veteran Households

Days Homeless by Population Group

This chart shows the average cumulative length of time households with certain demographic or system utilization characteristics, called population groups, were served in ES/SH or TH projects, or in RRH or PSH projects prior to move-in. The purple bars to the left of the Point of Housing line represent the average days homeless, including contiguous time in these projects prior to the report period.

The gray bars to the right of the Point of Housing line show the length of time households in each population group were served in RRH projects after move-in. The average days in RRH after move-in and the number of households included in the measure is shown in the hover text. This part of the measure only includes households that have a RRH housing move-in date.

The percent on the far right of the gray bar represents households in the population group who have a PSH move-in date within the report period.

Days Homeless by Population Group: Adult Only Households

Days Homeless by Population Group: Adult and Child Households

Days Homeless by Population Group: Adult Only Veterans

Exits from the Homeless System

Exits to Permanent Destinations

The percent of all households that exited from the homeless system to permanent destinations during the report period is shown in the call out text to the left of the chart. The bar chart shows the percent of exits to permanent destinations for each household type.

Exits from the Homeless System to Permanent Destinations by Household Type

Exits by Destination Type

The top chart shows all exits from the homeless system in the ring with exits to permanent destinations in green, exits to temporary destinations in orange, and exits to unknown destinations in yellow. The series of bar charts below shows the percent that exited to each destination category by household type.

Exits by Pathway

The charts below show the percent and number of households using different pathways or combinations of project types. The percent of households using each pathway is to the left of the bars.

The bars show the proportion of exits by destination type with the section on the left indicating permanent destinations, the section in the middle indicating temporary destinations, and the section on the right indicating unknown destinations.

Exits by Pathway for Adult Only Households: All Destination Types

Exits by Pathway for Adult and Child Households: All Destination Types

Exits by Pathway for Adult Only Households: Permanent Destination Types

Exits by Pathway for Adult and Child Households: Permanent Destination Types

Exits by Population Group

The charts below show exits from the homeless system for households with certain demographic or system utilization characteristics called population groups. The percent and number of households in each population group is shown on the left, and the percent and number of exits for that population group is on the right.

Exits by Population Group for Adult Only Households: All Destination Types

Exits by Population Group for Adults and Child Households: All Destination Types

Exits by Population Group for Adult Only Households: Permanent Destination Types

Exits by Population Group for Adults and Child Households: Permanent Destination Types

Exits by Destination

The charts below provide detailed destination information by destination type for each household type. Exits to permanent destinations are in the set of bars on the left side of the chart, exits to temporary destinations are in the bars in the middle of the chart and exits to unknown destinations are in the bars to the right side of the chart.

Exits by Destination for Adult Only Households

Exits by Destination for Adult and Child Households

Exits by Destination for Adult Only Households: Native Hawaiian/Other Pacific Islander

Exits by Destination for Adult and Child Households: Native Hawaiian/Other Pacific Islander

Returns to the Homeless System

Percent of Returns to the Homeless System

The charts below show the percent of households who returned to the homeless system within six months of exiting to a permanent destination. For each household type, the upper bar shows exits to permanent destinations and the lower bar shows the percent that returned to the homeless system within six months. The charts have been filtered by cohort to show returns within six months for households exiting in the first six months of the current report period, within the first six months of exiting to a permanent destination for households that exited in the 12 months prior to the current report period, and within the first six months of exiting to a permanent destination for households that exited in the 12 months prior to the current report period, and within the first six months of exiting to a permanent destination for households that exited 13-24 months prior to the current report period.

HH that Exited in the first 6 mos of the Current Report Period

HH that Exited in 12 mos Prior to the Current Report Period

HH that Exited between 12 and-24 mos Prior to the Current Report Period

Time Distribution of Returns

The charts below show the timeframe that households returned to the homeless system after exiting to a permanent destination over defined time intervals for each household type. The charts have been filtered by cohort to show returns within six months for households exiting in the first six months of the current report period, within the first six months of exiting to a permanent destination for households that exited in the 12 months prior to the current report period, and within the first six months of exiting to a permanent destination for households that exited between 12 and 24 months prior to the current report period. Return rates are cumulative for the timeframes available for each cohort; only the oldest cohort has return rates for the full three-year period.

HH that Exited in the 1st 6 mos of the Current Report Period

HH that Exited in the 12 mos Prior to the Current Report Period

HH that Exited between 12 and 24 mos Prior to the Current Report Period

Returns to the Homeless System Trend – Permanent Housing Destinations

The charts below show the percent of all households who returned to the homeless system from permanent housing destinations. Cohort 1 is households that exited in the first 6 months of the current report period, with 6 month returns only. Cohort 2 is households that exited in the 12 months prior to the current report period with 6 month and 12 month returns. Cohort 3 is households that exited between 12 and 24 months prior to the current report period with 6, 12, and 24 month returns. Charts for Adult Only and Adult and Child household types for All Populations and for Native Hawaiian/Other Pacific Islander (Head of Household) are included.
